

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A process of making a gel laundry and/or pre-treater detergent composition, the process comprising mixing ingredients comprising preparing a main mixture and a gelling post-mix, which comprise in total:
 - (a) from about 8% to about 35%, by weight of the composition, of a surfactant, selected from the group consisting of anionic, nonionic cationic, amphoteric surfactants and mixtures thereof;
 - (b) additional laundry composition ingredient selected from enzyme, builder, fluorescent dye, soil-release polymer, buffering agent, and mixtures thereof;
 - ~~(b)~~(c) from about 0.1% to about 5%, by weight of the composition, of a fatty alcohol;
 - ~~(e)~~(d) from about 50 to about 90% of water;

wherein

- (i) the mixing is carried out in at least one in-line static or dynamic mixer;
and
 - (ii) the gelling post-mix constitutes from about 1% to about 30% of the composition and comprises the fatty alcohol.
2. (Original) The process of claim 1 wherein the gelling post-mix is mixed with the main mixture comprising the balance of the ingredients immediately prior to the pumping to a filling station.
3. (Original) The process of claim 1 wherein the gelling post-mix further comprises an organic ingredient selected from nonionic surfactant, organic solvent, and anionic surfactant precursors and mixtures thereof.
4. (Original) The process of claim 1 wherein the gelling post-mix further comprises an antioxidant.
5. (Original) The process of claim 1, wherein the composition is substantially free of gelling polymers and viscosifiers.

6. (Original) The process of claim 1 wherein the composition further comprises from about 0.1 to about 6%, by weight of the composition, of a hydrotrope.
